MEMORANDUM FOR: Director of Medical Services

VIA: Deputy Director for Administration

FROM: Robert W. Gambino  
Director of Security

SUBJECT: Physical Examinations for  
OS Field Investigators

1. It is requested that the Office of Medical Services establish a program to administer physical examinations to Office of Security field investigators on a biannual basis. These men and women drive an estimated 25,000 to 30,000 miles per year while conducting investigations. In addition, many are frequently assigned to physically demanding support work.

2. The Office of Security recognizes the problems involved in establishing and implementing a program of this type. However, this Office believes that such a program is necessary to ensure that its field investigators are physically able to perform their duties.
